OBJECTIVE

A Motivated Information Technology student specializing in Web and Mobile Development, seeking an opportunity to apply and further develop my skills in web development, software development, and modern technologies. Eager to gain practical industry experience, contribute my ideas to meaningful projects, and collaborate and learn from experienced professionals while building a strong foundation for a career in the IT industry.

TECHNICAL PROFICIENCY

Programming Languages: JavaScript, Python, PHP, C#, SQL, HTML5, CSS3, Java, TypeScript
Frameworks & Libraries: React.js, Next.js, Django, Tailwind CSS, Node.js
Databases & Backend: Supabase, PostgreSQL, MySQL, Firebase, Firestore
Development Tools: Git, GitHub, Visual Studio Code, NPM, Figma, Selenium IDE
Game Development: Unity, 2D Game Development, C#

EDUCATION

Tertiary Bulacan State University	2023 - Present Bustos, Bulacan
- Bachelor of Science in Information Technology - Major in Web and Mobile Applications Development	
Secondary Immaculate Conception School of Baliuag	2017 - 2023 Baliwag, Bulacan
Primary St. Mary's College of Baliuag	2011 - 2017 Baliwag, Bulacan

PROJECTS

One Data Project Lead & Full-Stack Developer	2026
- Gathered and analyzed system requirements and translated stakeholder needs into functional system features. - Contributed to the design and implementation of the system's UI/UX and dashboards. - Coordinated development tasks, technical decisions, and project deliverables across the team. - Developed and integrated Role-Based Access Control (RBAC) into the system to manage user permissions and restrict access to features and data based on assigned roles. - Integrated an email API to automate transactional emails for account creation, password changes, and other user account-related processes.	
Brewtiful-U Advanced POS System Full-Stack Developer	2026
- Developed a native desktop POS and business management application using Electron, React, Node.js, and SQLite, supporting cafe, spa, and beauty operations. - Designed and implemented core POS functionalities, including multi-session transactions, product management, checkout, discounts, vouchers, customer management, and booking-linked transactions. - Developed and maintained the application's local database architecture using SQLite, including database schemas, migrations, transaction records, inventory tracking, technician assignments, vouchers, and service packages.	

- Integrated Supabase for cloud data synchronization and real-time updates between local and cloud data.
- Developed sales analytics and reporting features, including revenue summaries, category breakdowns, transaction analysis, daily sales trends, and PDF report generation.

Abella's Dry Goods - Desktop POS & Inventory Management System

2026

Full-Stack Developer

- Developed a local-first desktop POS and inventory management system using Electron, React, Node.js, and SQLite for product, pricing, customer, order, and payment management.
- Developed product and category management, multi-level pricing, customer balances, order processing, delivery, returns, and payment workflows.
- Implemented thermal receipt printing using ESC/POS with direct communication to a Windows COM port
- Developed a **sales and profit dashboard** to calculate and visualize revenue and product profitability based on delivered orders.
